President's message of Hellenic Thermal Medicine Academy

Dear colleagues and participants

The 6th Panhellenic Congress of Thermal Medicine will take place in cooperation with the European University of Cyprus and will be co-organized with the Regional Governor of Attica Mr G. Patoulis, the Regional Governor of Central Greece, Mr T. Spanos, the Mayor of Kamena Vourla Mr J. Sikiotis, the President of the Congress Professor K. Kouskoukis and the Cultural Development Organization of Central Greece.

Thermal Medicine, with the scientific documentation supports the thermal, mechanical, chemical and particularly biological and immunological effects of the healing

natural resources and has emerged as a complementary therapeutic method to the Classical Medicine. From ancient time health, wellness, power and beauty are among the most precious goods of life, particularly in ancient Greece, the care of physical, mental and spiritual health was an important part of Greek culture, according to Hippocrates, Father of Medicine, who founded the principles of Thermal Medicine.

The therapeutic methods of Thermal Medicine are: external hydrotherapy (balneotherapy), drinking therapy, inhalation therapy, clay therapy, salt therapy, thalassotherapy, cave therapy and biometeorological

therapy. Thermal Medicine updated from the empirical state to the scientific one with evidence studies (evidence based medicine) in Greece beginning 2006, has therapeutic actions in different diseases of myoskeletal, neurological, respiratory, cardiovascular, hematopoietic gastroenterological, urological and endocrine system as well as in dermatological, gynecological, allergic and otorhinolaryngologic ailments.

Therapeutic applications of Thermal Medicine in the various specialties are applied based on research, medical studies, doctoral theses and scientific papers. Thermal Medicine as a Complementary

THERMAL MEDICINE AS COMPLEMENTARY MEDICINE

Medicine helps eventually not only the treatment, recovery and rehabilitation of physical, mental and spiritual health, but also helps the treatment of silver & golden age, by applying longevity and well-being standards, as a preventive method.

The Hellenic Academy of Thermal Medicine was founded in 2015, aiming to establish and update Thermal Medicine as a complementary therapeutic method, with scientific documentation of its medical applications. Promising signs for Greece are the legal and institutional framework that ensure the scientific documentation of therapeutic actions from natural resources in various diseases, meanwhile an important positive development, is the decision of Plenary Session of Central Health Council in 2018 to establish Complementary Medicine integrating the Thermal Medicine. The on-going approval of prescriptions from National Organization of Health Services has confirmatory role for the effects of the complementary Thermal Medicine's therapies. This effort reflects the current situation in Greece that aspires for our country to become a global health resort - medispa not only for the elderly and patients with chronic diseases but also as Preventive Medicine, under the medical supervision, always by experienced and internationally acclaimed physicians. Our basic aim is to stop the «brain-drain» and develop the «braingain», as the interest is growing internationally since the

patients are looking for upgraded medical treatment, recovery, rehabilitation, antiaging and wellness services.

Substantial role plays the establishment of a Master Degree Program specialized in Thermal Medicine in the Medical School of Athens, as well as a similar e-learning program. This effort has the ultimate goal of integrating Thermal Medicine as an elective course in undergraduate medical students' education and additionally as thermal medical education in postgraduate programs related to different specializations.

Determinant is the contribution of Attica Regional Governor President AMA, G.H.D.I., IHTC, ELITOUR and Founding Member of the Hellenic Academy of Thermal Medicine G. Patoulis, in promoting and establishing internationally the Thermal Medicine. He with his inspirational energy created the Global Hippocrates Institute of Doctor's and the International Health Center, formulating national policy for the revival of Hippocrates's spirit establishing Greece to be prominent not only as therapeutic but at the same time as educational center of Hippocrates's Medicine and Classical Medicine with holistic approach.

Encouraging is also the contemporary and technocratic perception and understanding of Minister of Tourism Mr. T. Theoharis. d. Minister Mr E. Konsolas and President of N.T.O. Mrs. A. Gerekou f. d. Minister of Culture and Tourism, concerning the finan-

cial evaluation of the establishment and promotion of Greece as Health Tourism wellness destination, especially for elder people in combination with all thematic forms of tourism (clusters) inducing high added value and new jobs.

I honorarily invite you to the 6th Panhellenic Congress of Thermal Medicine with international participation that will be held 09 - 11 October 2020 at the Galini Hotel, Kamena Vourla. In this Congress will participate outstanding colleagues, as well as internationally well established personalities who will present all the scientific up to date information and evolutions in the Thermal Medicine while at the same time lectures, workshops and round table discussions will take place.

Yours sincerely

Kouskoukis Konstantinos
